

Āhau is a whānau data management platform that helps whānau, hapū, Iwi capture, preserve, and share important information and histories into secure, whānau-managed databases and servers.

Whānau can use Āhau to keep track of whakapapa information and connections, to store and share historical records and narratives, and to build a stronger sense of whānau, community and identity.

WHAKAPAPA RECORDS

Maintain whānau and whenua connections through our collaborative whakapapa record management tool

TRIBAL REGISTRIES

Record and maintain up to date whanau information with whakapapa linked tribal registries

CULTURAL ARCHIVING

Capture, preserve and share cultural heritage, histories and narratives all stored in whānau owned and managed archives

DATA SOVEREIGNTY

Create your own Pātaka and connect it to the internet to safely store and securely share records, and archives with your whānau

Current Development

Te Arawa Lakes Trust
